

PANORAMA ANTENNAS

The Multiband 'Easyfit antenna is a high performance interior antenna designed for new generation cellular mobile networks.

800MHz,
900MHz,
1800MHz,
1900MHz,
3G UMTS

Fitting Instructions

Part No EFC3G

1. Clean glass if necessary using the alcohol swab supplied.
2. Before removing protective film, ensure cable can be routed to avoid damage.
3. Ensure antenna orientation is correct - antenna should be vertical with cable outlet to the side for optimal performance.
4. Remove protective film and press firmly into the desired position on the windscreen.
5. Finally, complete cable routing and connect to handsfree car kit antenna connector.
